
Hello,

I have received today in the post (03/06/2026) at my residence ... a notice from Real Property Signs, Public Notifications Specialists. The letter was dated May 6th, so was posted after that. ... just arrived home today to receive this notice. It was a very short consultation period (May 8-29th) and due to our being ... we have just missed the consultation period by a couple days. ...

The proposed development is very tall ... at Our main concern is the ... retaining wall between the two properties if any earth works are involved in the new development. We would request the following:

1. That civil engineering works be conducted to ensure the stability of the existing retaining wall and improvements made as required.
2. The new development should have no clear glass west facing windows ...
... Ground floor west facing windows are OK but not from the second or third stories.
3. The new development should have no west facing outdoor decks/living areas on the second or third floors ...

Kind regards
