

Approved Drawings and Documents

The approved drawings and documents conditioned as part of the existing approval application are specified in Table 7 below, extracted from the Conditions Approval Package Document. As a result of this change application, the table of approved documents will be required to be updated to reflect the amended plans and documents. Plans proposed to be removed have been identified in strikethrough text while new plans are identified in bold text and underlined.

Table 7: Approved Drawings and Documents

Condition Amendment(s)

A copy of the existing approval, including conditions, is provided under Attachment A. The aspects of the relevant conditions that are proposed to be amended are identified in strikethrough text while the additions are identified in bold text and underlined. The requested amendments seek only to update the references made to technical reports.

<p>27) Acoustic Attenuation Measures</p> <p>Implement the acoustic attenuation measures for the operational phase of the development, as outlined in Sections 6 and 7 of the Acoustic Design Report, Drawing no. B2-A2-02-00-RPT-B-TDR-REV, dated 30 August 2024 and received 20 February 2025, <u>and</u> <u>Minor Height Reduction – Acoustic Impacts correspondence dated 6 February 2026.</u></p>	<p>Prior to commencement of use</p>
<p>27(a) Submit Acoustic Certification to Council</p> <p>Submit Certification to Council, by a suitably qualified acoustic consultant demonstrating the following:</p> <ul style="list-style-type: none"> · the acoustic treatments as outlined above have been implemented; and · noise emissions from all mechanical plant & equipment when operated under a worst case scenario, comply with the noise criteria at ground & elevated sensitive receptors, as prescribed in PO2 of the <i>Industry Code</i> 	<p>Prior to commencement of use</p>
