

Hi DA team

[...] the lot that is proposed to be developed - Appln No.A006698906

My husband and I are strongly against the development, as the Lots 7 and 8 RP93687 have a strong bird life that home themselves in the large trees in those lots, in particular - lorikeets, kookaburras and some endangered owls.

Additionally there are atleast 2 wallabies who live there. I see them regularly in the long grass [...]

Also there are several large well established gum trees. Will these trees be cut down if the development occurs?

Please let me know.

Thanks and kind regards
