

Streetscape hierarchy overlay code		
Performance outcomes	Acceptable outcomes	Response
Section A—If for accepted development subject to compliance with identified requirements (acceptable outcomes only) or assessable development		
PO1 Development must improve pedestrian movement and amenity by providing for verges to a width that is appropriate to accommodate large subtropical street tree planting and high levels of pedestrian movement.	AO1 Development ensures that a verge is provided via a linear land dedication to create a minimum verge width as specified in Table 8.2.20.3.B and the streetscape locality advice and road corridor design standards in the Infrastructure design planning scheme policy.	Complies Dorchester St is a "neighbourhood Street (minor)". Immediately in front of 6 Dorchester St the street has 2 traffic lanes, with a parallel parking lane on the north side. The face of the kerb is 3.75 m from the front boundary. Immediately east of the concrete driveway into our site, the kerb line changes provided nose to kerb parking and an extra no-through access lane, but that change to the kerb line is not in front of our site.
 		
PO2 Development must construct verges including street tree planting, street furniture, paving, lighting and verge and kerb treatments that establish a high-quality subtropical streetscape with a strong pedestrian amenity focus.	AO2.1 Development ensures that existing street trees are retained and protected.	Complies The street tree in the footpath verge is not affected by the proposal
	AO2.2 Development ensures that street tree planting, street furniture, paving, lighting and verge and kerb treatment are designed and constructed in compliance with the specifications of the streetscape locality advice and road corridor design standards in the Infrastructure design planning scheme policy.	Complies
Section B—If for assessable development		

Streetscape hierarchy overlay code		
Performance outcomes	Acceptable outcomes	Response
PO3 Development ensures that the design of a corner land dedication identified on the Streetscape hierarchy overlay map: a. facilitates a high level of pedestrian movement and activity; b. enforces the sense of arrival to individual precincts and major connections; c. provides a landmark definition through its materials and landscaping including deep-planting feature trees, seating and public art that integrates with the public realm.	AO3.1 Development ensures that a corner land dedication is provided: a. where identified in the Streetscape hierarchy overlay map; b. in compliance with a neighbourhood plan and the road corridor design and streetscape locality advice standards in the Infrastructure design planning scheme policy.	N/A
	AO3.2 Development ensures that landscaping including a large feature tree and seating is provided in a corner land dedication area in compliance with the specifications and standards in the road corridor design and streetscape locality advice standards in the Infrastructure design planning scheme policy.	N/A
	AO3.3 Development ensures that public art is provided in a corner land dedication area where identified in a neighbourhood plan and in compliance with the specifications and standards in the streetscape locality advice and public art standards in the Infrastructure design planning scheme policy.	N/A
If in or on a site adjoining the Wildlife movement solution sub-category		
PO4 Development incorporates effective wildlife movement infrastructure that enables safe wildlife movement across and past transport infrastructure.	AO4 Development ensures that infrastructure solutions are: a. provided at the locations identified on the Streetscape hierarchy overlay map; b. designed to: i. account for daily and seasonal movement needs of native wildlife, such as foraging, breeding, predator and natural disaster avoidance; ii. achieve physical separation of native wildlife and the road; iii. adopt designs and treatments known to be used by native species, including significant fauna species listed in the Biodiversity area overlay code. Note—Refer to the Infrastructure design planning scheme policy for further guidance of the design of wildlife movement solutions.	N/A
