This email originates from outside of Brisbane City Council.

To whom it may concern.

I would like to formally submit my objection to the planned development at 20 & 30 Greentree cresent, Forest Lake, QLD 4078.

With the main areas of concern being:

Destruction of wildlife habitat: There is an abundance of wildlife that live in the area of the proposed development. The most disappointing part is that development has already started in this area on neighbouring plots and there has been no regard to the wildlife habitat what so ever with every single tree removed. Being a local resident, I have witnessed first hand some of the displaced wild life. There should be no reason why the developments couldn't be more simpathetic and keep some of the trees. Its just lazy planning to maximise the return at the expense of the animals.

There will be increased Traffic and Congestion that this new development will cause much higher volumes of traffic at an already congested junction where accidents seem to be a weekly occurrence.

We have multiple small block developments in the area, all of which have insufficient parking leading vast amounts of cars parked on the streets and nature stips. This development is on a corner blind corner which will cause traffic issues once the nature strips and roads fill up with parked cars.

Kind regards
