This email originates from outside of Brisbane City Council.

I'm writing to oppose the development proposed for the lots on Hawkesbury Rd. The area is a nature reserve housing koalas and other native species. As well as the detrimental environmental effect, housing is rural residential with insufficient infrastructure to support high density increased volume. This pertains to congestion on Moggill Road . Aesthetically ruining the quality of living in a non built up area I hope you do not proceed with this development.
Regards,
