hi > submissions for applicationId=a006857183

chairperson for kymberlina body corporate (5 woodford street)

our concerns are

- 1 where is the roof water and storm being dispersed. the plan has pipes under ground not going anywhere .
- 2 sewer pipe does it hook up
- 3 plans show as being woodford street ,, it that goes past the back of site to the back

4 what material is being used for the back fence

5 2 trenches heading towards the back fence that stops at the fence line

after heavy rain we can get water up to 1 meter deep and cannot afford to get any more run off from this new development as the driveway slopes back
