Dear Katrina

I would like to ensure that you are aware of a further submission which I made yesterday in relation to DA A007032991.

As the basis of this submission, I had engaged the services of a building designer to prepare a number of elevations which provide a comparison between a zone-compliant development (5 storey), and the non-compliant development (8 storey) which is currently being proposed.

This submission details our key concerns about the proposed development, including a significant reduction in privacy, and access to natural light and ventilation. Increased noise and exhaust gas emissions due to vehicle usage, are also an important concern.

Regards

....

Dear Katrina

In relation to DA A007032991 which is currently being assessed by Council, I would like to ensure that you are aware of a number of submissions which I have made over the past two months.

These submissions address several different aspects of the proposed development, and the impacts that the proposal development would have on my family, my property, and my quality of life, if it were to proceed in the form currently proposed.

Please let me know if you would like to discuss any of the matters which I've raised, or would like further information.

Regards

....
