

Good afternoon,

I am objecting to the redevelopment at 69 Davenport Street Chermside Qld 4032.

Firstly you have the address listed incorrectly. It is 48 Wallace Street Chermside - this is where the front door is located.

Secondly I do not believe 10 Units/Apartments will fit on this block. The block is not big enough in my opinion.

If only Brisbane was a planned city..... there was a rumour many years ago the city centre would have been built around Norman Park..... However all the floods that have hit Brisbane over the years would not have saved Norman Park had the CBD been created there.....

I understand the big 4 suburbs for ongoing development are Chermside, Upper Mt Gravatt, Carindale and Indooroopilly. Get all the Town Planners and Architects together and find a new solution. I don't like houses being resumed for new Units/Apartments. Nor do I like old Unit complexes being knocked down.

Find a new solution.....

So just to be clear, I firmly object to the redevelopment of 48 Wallace Street Chermside (not 69 Davenport Street)...

Thank you,
