

Good Morning ,

I wish to voice my opposition to the intended development in my street A007025371 , [...]

Kelso street currently has significant issues with parking and the ability for residents to safely exit there driveways due to lack of visibility from parked vehicles , there has been a number of accidents because of this already , now five houses are being replaced with 193 units , there is never enough visitor parking given to these multi level developments so that will turn our street into a one lane road effectively and create traffic chaos , I want to know what steps are being taken to ensure this will not be the case ? I understand that the area is zoned for high development but it seems as in other streets in the area it is at the cost of the others that currently live there but not in multi level dwellings , we pay rates and therefore should be entitled to a quality of living that isn't forsaken by this type of development .

Best regards
