Attachment 2—Advice to the applicant

General advice	
1.	Terms and phrases used in this document are defined in the <i>Planning Act 2016</i> , its regulation or the State Development Assessment Provisions (SDAP) (version 3.1). If a word remains undefined it has its ordinary meaning.
2.	A development permit for operational work to implement the reconfiguring a lot may be required to be obtained before any interfering with koala habitat can be carried out, and the permit application must be lodged with the Chief Executive administering the <i>Planning Act 2016</i> .
3.	<p>The Nature Conservation (Koala) Conservation Plan 2017 includes mandatory requirements that apply to all persons undertaking clearing of koala habitat trees, including that clearing be undertaken sequentially and in the presence of a koala spotter. Penalties for non-compliance apply.</p> <p>For further information please contact the Department of the Environment, Tourism, Science and Innovation at koala.compliance@detsi.qld.gov.au.</p>
4.	<p>In addition to this development approval, other permits or approvals may be required for the clearing of koala habitat. To determine if the proposed clearing requires other approvals under other local, State or federal laws go to www.qld.gov.au (search 'vegetation clearing requirements').</p> <p>It is the responsibility of the land owner to ensure that all necessary permits and approvals have been obtained before undertaking any clearing.</p>
5.	Clearing of vegetation has the potential to disturb the roots of the trees of proposed retained vegetation thereby resulting in the death of trees not approved to be cleared under this development approval. It is recommended clearing and excavation activities be undertaken in accordance with the 'Australian Standards for the Protection of Trees on Development Sites (AS4970-2009)' to avoid any consequential unauthorised clearing.
6.	<p>The development site contains habitat for threatened and special least concern fauna species. If the development requires tampering with a protected animal breeding place, a species management program may be required.</p> <p>More information on protected animal breeding places and species management programs can be found here: https://environment.des.qld.gov.au/licences-permits/plants-animals/species-management-program</p>

Attachment 3—Reasons for referral agency response

(Given under section 56(7) of the *Planning Act 2016*)

The reasons for the SARA's decision are:

SARA assessed the development against the following code(s) of the State Development Assessment Provisions (SDAP), version 3.1:

- State code 25: Development in South East Queensland koala habitat areas

The development complies with the assessment benchmarks of State code 25 of SDAP in that the development:

- does not cause an unacceptable impact on mapped koala habitat areas.
- results in an acceptable significant residual impact on matters of state environmental significance.
- is conditioned to provide an offset to ensure a conservation outcome is achieved.

Material used in the assessment of the application:

- the development application material and submitted plans
- *Planning Act 2016*
- Planning Regulation 2017
- the SDAP (version 3.1), as published by SARA
- the Development Assessment Rules
- SARA DA Mapping system
- section 58 of the *Human Rights Act 2019*
