

Submission ref A007025301, 71 Eleanor Street Carina

Attention: Nicholas Cudicio

I support the proposed subdivision because it provides an additional housing opportunity in a well-serviced area where people can readily access existing transport, schools, shops and services. Creating another residential lot is a practical way to increase housing supply and housing choice and can assist with improving housing affordability. I strongly support the application and believe Council should support this logical infill development.

Yours sincerely,

....
